Currency Exposure

*Intra year performance figures are unaudited; the returns are net of management fees and before taxes; the MSCI figures are the MSCI World Total Return Index (net local).

**Peters MacGregor generally hedges foreign currency exposure when it invests in international securities. As part of this policy it considers the intrinsic currency exposures of investee companies. The graph summarises the principal net currency exposures based on generally accepted accounting standards. GAAP measures currency exposure based on the country of stock exchange listing in which the investee company security is held, which is not necessarily reflective of the intrinsic currency exposures of the investee companies.
